

## **BROSSOL<sup>®</sup>-ROD**

### **BAR BRUSH ANTI RODENT INTRUSION (PROOFING)**

Rodents are often the source of nuisance and cost intensive damages (cut through cables and fibre optic lines, damaged electrical components, ...).

BROSSOL<sup>®</sup>-ROD is a polyamide brush, mounted on an aluminium bar that is installed on the bottom of the door to close gaps of more than 5 mm. It creates a physical barrier that prevents rodents from entering.

BROSSOL<sup>®</sup>-ROD is already used by SNCF, RTE, VNF, ORANGE and other public and private companies.

Application videos please see our internet site.

## ADVANTAGES

BROSSOL<sup>®</sup>-ROD is an anti intrusion rodent barrier (proofing):

- Proven: thousands of doors in Europe are quipped
- Efficient: creates a physical anti intrusion rodent barrier
- Weather resistant
- Adaptable for all doors by cut on needed length
- Easy to install: aluminium bar is screwed or riveted
- Environment friendly
- Long life

## INSTALLATION

- Cut the bar brush on length needed.
- Drill holes with distance of 300 mm in bar brush (at the ends distance is 50 mm).
- Screw or rivet aluminium bar above gap to be closed.

## TECHNICAL DATA

Standard length	2,0 m and 3,0 m
Height of brush	24 mm
Bristles / Colour	Polyamide / Black
Fire resistance	UL94 VO
